

Printing for Professionals

Océ helps the people who make our world. Companies everywhere use Océ technical documentation systems in manufacturing, architecture, engineering and construction. High speed Océ printing systems produce millions of transaction documents each week, such as bank statements and utility bills. And in offices around the world, people use Océ professional document systems to keep the wheels of business and government turning. Océ is also at work in publishing on demand, newspaper production and wide format colour for spectacular display graphics.

Puts CAD printing in the fast lane

Wide format colour printer

Puts CAD printing in the fast lane

Wide format colour printer

Short design cycles, tight deadlines, increasing numbers of colour CAD documents? The last thing you want is print queues that turn into traffic jams. The new Océ TCS300 puts your wide format printing in the fast lane. Now, your printer is waiting for you—not the other way round. Matching its high speed, the Océ TCS300 has extremely easy handling. So you get the results you need, when you need them. Every time, every document.

High-speed printing: in the fast lane

Whether it's black & white or colour, you'll maximise your wide format output with the Océ TCS300. Speeds as fast as 40 seconds for an A0 CAD plot in monochrome and 1 minute in colour will enable you to meet your tightest deadlines.

Wide format productivity: in the fast lane

High productivity demands more than speed alone. With the Océ TCS300 you'll save time at every stage. Thanks to powerful processing, there are no long waiting times before printing starts. While one document is printing, the next file is already processed. After printing, you can use your CAD plots directly: there's no drying time. And no trimming is needed, so your plots are ready for use immediately.

Easy system operation: in the fast lane

Easy operation streamlines your wide format workflow. The Océ TCS300 helps users to get the results they want, with an intuitive interface, best-in-class printer driver and clear system feedback. Loading media and changing inks are just as easy, for operation that's always right first time.

Quality results: in the fast lane

Like every Océ printer, the Océ TCS300 provides outstanding print quality, without the need for time-consuming manual settings. Thanks to the intelligent Dynamic Switching Technology, the printer chooses the optimum print strategy. So there's no need for trial & error by the operator. And with the convenient colour management module, it's easy to produce output with the colours you expect.

Return on investment: in the fast lane

With the Océ TCS300, efficient handling of all your wide format plots is assured. Thanks to its robust design and impressive performance, the Océ TCS300 not only meets your expectations now but also ensures productive, efficient operation for years to come.
