

Océ CS2044 Multifunctional

System information

All the colours of success

Wide format colour multifunctional

Powering your document workflow, this new Océ multifunctional solution is economic to own and easy to operate. The Océ CS2044 Multifunctional is perfectly integrated, with an intuitive interface for all document functions. Whether you want to copy, scan to file or scan to email—or of course just print—you'll get outstanding colour results every time.

Whatever your workflow demands

Standard printing and copying are no longer enough in today's digital document environments. Of course, you often need to copy physical documents. But just as likely, you want to scan hard-copy documents to secure, easily accessible digital files. Or instantly email scan files, with a single, time saving action. It's even possible to copy documents to remote printers anywhere on your network, with the optional Océ Colour Copy Full version software.

Perfectly integrated for smooth operation

The Océ CS2044 Multifunctional combines proven Océ components and software into a perfectly integrated solution. That means smooth, trouble free operation from the simple Océ Colour Copy Lite software interface. It gives you fingertip access to every function you need, with the Océ 'green button' for instant, right-first-time copies and scans. Although functionally integrated, the scanner and copier are physically separate units for optimum ease of system access in every situation.

Enhances professional print providers' services

For print providers, the Océ CS2044 Multifunctional opens the way to efficient, profitable handling of wide format colour originals. Both copying and scan to file can be carried out quickly and accurately, with minimum effort and maximum clarity and retention of information. As well as handing-over colour copies of outstanding quality, print providers can save time by emailing digital files of scanned originals to their customers.

Brings colour capability to corporate printrooms

With many corporate printrooms making the transition to colour—both for technical drawings and graphic arts work—the Océ CS2044 Multifunctional is the ideal way to handle this extra workload. It has the built in flexibility to meet all in house demands: from a few quick colour copies right through to extensive email distribution of released drawings. And the economic cost of ownership makes it an attractive proposition, even at relatively low volumes.

Colour scanning without complexity

The Océ CS2044 Multifunctional is based on the proven Océ CS4142 colour scanner with a scanning width of 42 inches. The scanner forms the basis for the system's professional results with minimal time and effort. It eliminates manual adjustments, trial & error and staff training, and ensures maximum clarity and information retention. The scanner offers simple, time-saving maintenance, with built-in diagnostic software and user-replaceable lamp unit.

The printer for successful colour

Perfectly matching the scanner is the Océ CS2044 wide format colour printer, which ensures successful colour for every print or copy job. This printer gives strikingly sharp line drawings and GIS plots, plus brilliant colour renderings and photo quality images. And it makes outstanding colour quality easy to achieve every time, with automatic selection of the right settings every time. Reducing errors and saving valuable time and money on every job.
